DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 02, 2003 has been entered.

Status of the claims

2. Claims 10-12 and 17 are pending in the instant application.

Claims 10-12 and 17 are under examination in the instant office action.

3. The Text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action

Claim Rejections - 35 USC § 101

4. Claims 10-12 and 17 stand rejected under 35 U.S.C. 101 because the claimed invention is drawn to an invention with no apparent or disclosed specific and substantial credible utility for the reasons of record in section 11 of Paper No.16 and section 5 of Paper No.18. Briefly, the instant application has provided a description of an isolated DNA encoding a protein and the protein encoded thereby. The instant application does not disclose a specific biological role for this protein or its significance to a particular disease, disorder or physiological process, which one would wish to manipulate for a desired clinical effect.

The Declaration of Flannery under 37 CFR 1.132 filed February 03, 2003 is insufficient to overcome the instant rejection because the data presented therein supports only the utility of a specific mutation in the ZGGBP1 gene as a marker for bipolar affective disorder. However, the instant claims are directed to the polypeptide encoded by a normal copy of the gene and not to the mutated DNA. One skilled in the art readily understands that the specific utility of the deviated DNA as a marker for a pathological condition cannot be simply extrapolated to provide a readily apparent use for the polypeptide itself, for which there is no information regarding level of expression, specific biological activity or role in this particular pathology disclosed.

Thus, since the instant specification does not disclose a credible "real world" use for the encoded protein then the claimed invention is incomplete and, therefore, does not meet the requirements of 35 U.S.C. § 101 as being useful.

Claim Rejections - 35 USC § 112

5. Claims 10-12, 17 are also rejected under 35 U.S.C. 112, first paragraph for the reasons of record in section 12 of Paper No.16 and in section 6 of Paper No. 18.

Conclusion

6. No claim is allowed.

7. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action

after the filing of a request for continued examination and the submission under 37 CFR 1.114. Sec MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
